

VACANCY - MECHANIC

Do you thrive off delivering first class customer service, building relationships and working as part of a talented organization? IK is experiencing increased demand for our services and we are looking for highly motivated workshop mechanics who can join our team.

We seek to hire candidates who have experience in piping systems from a mechanical point of view. In return, we can offer a positive and fast paced working environment, problem solving activities and challenging operational requirements.

DUTIES & RESPONSIBILITIES

- Testing and following up on construction sites both onshore and offshore, domestically and abroad
- Participate in the fabrication of equipment as required
- Participate in systematic maintenance in IK's workshop
- Become specialized in one or several of the services IK has to offer
- Participate and understand the company's HSE and quality assurance measures

QUALIFICATIONS

- We are looking for those with experience from various mechanical tasks such as pressure testing, working on pressurized equipment, knowledge of hydraulics.
- Minimum 5 years relevant experience with a Certificate of Apprenticeship (In some cases we will accept experience as compensation for a lack of formal education)

PERSONAL ATTRIBUTES

- Exceptional technical skills
- Ability to work under pressure
- Effective problem-solving skills
- Teamworking and positive attitude
- Working level English both written and spoken

Workplace: Predominantly at IK-Group, Christian August Thoringsveg 9, Stavanger. However you may be required to work away from home from time to time as required.
